PROFESSIONAL SUMMARY

Computer Science Engineering student with practical expertise in SQL, Python, Power BI, and Advanced Excel. Experienced in relational database querying, data modeling, and performance reporting developed through technical internships, academic projects, and industry job simulations. Adept at building interactive dashboards, standardizing unstructured datasets, and translating transactional data into actionable business intelligence.

EDUCATION

B. S. Abdur Rahman Crescent Institute Of Science And Technology **Sep 2022 – May 2026**
B.Tech Computer Science Engineering – ***CGPA: 7.71*** *Chennai, India*

TECHNICAL SKILLS

Databases & Querying: SQL (MySQL), Relational Database Design (3NF), Joins, Subqueries, CTEs, Aggregations
BI & Data Visualization: Power BI (Power Query, DAX Measures, Star Schema, Dynamic Visuals), Excel (Pivot Tables, XLOOKUP, Data Cleaning)
Programming & Analytics: Python (Pandas, NumPy)
Developer Tools: Git, GitHub, VS Code, Jupyter Notebook, MySQL Workbench
Core Concepts: DBMS, Normalization, Query Optimization, Data Structures, OOP

EXPERIENCE

Cognifyz Technologies **Nov 2024 – Dec 2024**
Web Development Intern *Remote*

- Developed interactive front-end components and data-driven dashboards using JavaScript, HTML5, and CSS3.
- Integrated front-end forms with backend data endpoints, ensuring seamless data capture and input validation.

Cognifyz Technologies **Jul 2025 – Aug 2025**
Java Development Intern *Remote*

- Engineered and tested SQL queries across relational database tables to support backend application data flow.
- Developed and validated REST APIs for structured JSON retrieval, ensuring reliable data extraction and integrity.
- Analyzed query performance bottlenecks and optimized indexing strategies to enhance data retrieval speeds.

PROJECTS

Student Enrollment & Course Analytics Dashboard | Power BI, Power Query, DAX **2026**

- Ingested and modeled 200+ student enrollments using Power Query and custom DAX measures.
- Built interactive dashboards with KPI gauges, donut charts, and dynamic demographic slicers.

Sales Performance Dashboard | Advanced Excel, Pivot Tables, Power Query **2026**

- Processed 100+ multi-region sales transactions to evaluate cost, revenue, and product profit margins.
- Built an executive Excel dashboard using multi-dimensional Pivot Tables and interactive slicers.

Fitness Studio Database System | SQL, MySQL, Python **2025**

- Architected a 3NF relational schema in MySQL to manage fitness bookings and member records.
- Authored optimized SQL queries using multi-table JOINs and aggregations to analyze utilization trends.

CERTIFICATIONS

- 30 Days Power BI Micro Course – SkillCourse
- Object Detection – Cognitive Class
- Deloitte Data Analytics – Forage
- Deloitte Technology Simulation – Forage
- Tata Data Visualization – Forage
